

Object: REACH Regulation on articles.

Dear Customer,

*REACH Regulation (n. 1907/2006/CE)* is concerning the registration, evaluation and authorisation of chemical substances and came into force June 1<sup>st</sup>, 2007.

The REACH regulation foresees that all the producers and/or importers from Countries outside the UE of more than 1 tons/year of chemical substances or products (mixture of substances) ought to register it to the ECHA Agency (different timing and methods depending on quantity and danger properties of the substances).

Referring to what is written into the REACH regulation we inform you that we're conforming to it.

We're not producers or importer of chemicals, but we are classified as downstream users and we don't produce or import from countries outside UE chemical substances or chemical mixture. as downstream users we have already started the evaluation of our dealer from REACH point of view.

We're collecting all the information about the pre-registration and/or notification of chemicals that we buy and when (taking into account the REACH Regulation timing) we'll have some news useful for you we'll send as soon as possible

We also asked to our supplier information about substances included in article n° 57 of the REACH Regulation, included in the Annex XIV of the Regulation 1907/2006 (as defined by the Regulation 999/2017/CE) and/or included in the updated "Candidate List" of products probably input in the ANNEX XIV of the REACH Regulation (as updated on January 19<sup>th</sup>, 2021) or substances included in the Annex XVII of the REACH Regulation, as modified by the European Regulation 957/2019/CE.

Referring to what we'll receive from our dealers, according to the methods and the timing foreseen into the REACH Regulation, we'll ask to them the new material safety data sheet (MSDS) [modified as request by the European Regulation n°453/2010/CE and subsequent amendments and additions] and we'll send you immediately.
